Transforming business, making life simple

ADD SPATIAL CONTEXT
TO YOUR ORGANISATION'S
INFORMATION AND
BUSINESS PROCESSES,
INCREASE PRODUCTIVITY
AND EFFICIENCY, AND
DELIVER SUPERIOR
SERVICE TO CUSTOMERS.

OVERVIEW

Whether it's responding to a customer request for service information, managing risk in relation to an asset, or understanding how a proposed development might impact streetscape, organisations need intuitive access to enterprise location data.

TechnologyOne Spatial is an integrated enterprise solution that enables any geographic information to be easily visualised and analysed. It provides spatial context to many areas of your organisation including property, planning and development, and physical infrastructure and operational work management.

Break down data silos for informed decision making

Visually analyse data from many different sources to get fresh insight and easily identify patterns, trends and relationships to make informed business decisions. Combine property data such as land ownership with physical asset information on a map to take the complexity out of risk assessment for planned maintenance.

Provide customers with self-service access to information

Provide customers with interactive maps on your website for details about services and facilities, planning and zoning, and local topographical information. Reduce demand on your call centre to manage simple requests for information.

Increase field productivity and work management

Streamline the management of day to day work on assets with greater context for asset location and efficient resource management.

Save time and money through reduced fuel usage and improved route optimisation by quickly locating open work orders near a particular field crew and group these together for them to complete while in the area.

Streamline work and scheduling activities, such as the logistics of maintaining assets, to help save labour, time and materials.

Gain deeper asset knowledge for lifecycle management

Use the location of geographically dispersed assets to optimise the management and maintenance of your assets over their lifetime. Visually locate any assets within range of a failed asset that need to be inspected, to improve maintenance and planning accuracy.

Reduce IT complexity and improve data integrity

As an enterprise solution, TechnologyOne Spatial eliminates data duplication - no more copying and synchronising GIS data from different applications. As a web based solution, it can be delivered via a standard web browser to any connected device. Create a single source of truth and improve the overall quality and accuracy of data.

SPATIAL ENABLES YOU TO...

- ✓ Spend less time searching for, collating and managing data
- ✓ Translate data into an intuitive online map
- ✓ Streamline workflows by providing users with access to information via a single interface
- ✓ Make GIS information readily available across your entire organisation
- ✓ Make informed long term decisions about your assets, planning and development
- ✓ Provide customers with accurate and timely access to essential information via your website
- ✓ Integrate GIS with other core business systems
- ✓ Provide field teams with spatial information on mobile devices
- ✓ Reduce reliance on your spatial team with self-service data capability

OUR APPROACH

OUR ENTERPRISE VISION

The power of a single, integrated enterprise solution

Experience the power of a single, integrated enterprise solution built on a single modern platform with a consistent look and feel.

MARKET FOCUS AND COMMITMENT

Preconfigured enterprise software solutions reduce time, cost and risk

A deep understanding and engagement with our seven key markets means we can deliver to our customers integrated, preconfigured solutions that provide proven practice, streamline implementations and reduce time, cost and risk.

THE POWER OF EVOLUTION

An enterprise solution that adapts and evolves

Substantial investment into R&D each year means we provide our customers a strong, continuing competitive advantage through an enterprise solution that adapts and evolves by embracing new technologies, concepts and innovation.

SIMPLICITY, NOT COMPLEXITY

Enterprise software, incredibly simple

Software that embraces consumer concepts and expectations to deliver solutions that are incredibly easy to use and remove complexity.

THE POWER OF ONE

One vision. One vendor. One experience.

When you invest in a TechnologyOne solution you benefit from a direct relationship with us every step of the way. We do not use implementation partners or value-added resellers. We take complete responsibility for building, marketing, selling, implementing, supporting and running our enterprise solution for each customer to guarantee long-term success.

Transforming business, making life simple

TechnologyOne (ASX:TNE) is Australia's largest enterprise software company and one of Australia's top 200 ASX-listed companies, with offices across six countries. We create solutions that transform business and make life simple for our customers. We do this by providing powerful, deeply integrated enterprise software that is incredibly easy to use. Over 1,200 leading corporations, government departments and statutory authorities are powered by our software. We participate in only eight key markets: government, local government, financial services, education, health and community services, asset intensive industries, project intensive industries and corporates. For these markets we develop, market, sell, implement, support and run our preconfigured solutions, which reduce time, cost and risk for our customers. For over 30 years, we have been providing our customers enterprise software that evolves and adapts to new and emerging technologies, allowing them to focus on their business and not technology. Today, our software is available on TechnologyOne SaaS and across smart mobile devices.
