SaaS Platform

**ERP Software as a Service,
driving business transformation.**

Transformation never stops

So neither do we

Our Software as a Service (SaaS) Platform represents 32 years of continuous investment in software and technology evolution.

As the only company offering a true global SaaS ERP solution across the entire enterprise, we are transforming business and making life simple.

> ## The solution has enabled us to remove a huge amount of complexity and save millions of dollars.

NOOSA COUNCIL

Unleash the power of simplicity

Whatever your business does, management of an enterprise software solution isn't one of them – so why make that a focus?

Moving to SaaS is a logical step for organisations serious about operating efficiently and securely in the 21st century and beyond.

Our SaaS Platform offers the highest level of security, always-on reliability and the opportunity to scale usage up-or-down to suit your business' needs.

Knowing that system upgrades, data security and performance are taken care of, means you can concentrate on your core business and your customers.

TechnologyOne SaaS

Our industry-specific SaaS ERP solutions are continuously evolving to solve your everyday business challenges and simplify the way you work.

Our integrated approach to enterprise SaaS enables you to manage your core business via a single platform. Team members can tap into a modern user interface on any device, anywhere, at any time and collaborate on the go. Transformation has never been simpler.

Take a closer look

Security

Feel confident knowing we maintain the highest level of security testing, accreditations and compliance audits.

- 'Security by Design' is the foundation of everything we do.

- Security is built into our platform and processes, from the ground up.

- Leading security monitoring capabilities into how and when your system and data is accessed.

- Continual program of penetration and vulnerability testing.

- All systems and servers are continually patched without disruption to your service.

- Designed, developed and verified in collaboration with the global leader - AWS

- Compliance with the following internationally recognised standards:

  - ISO 27001, 27017, 27018 – for IT professionals

  - ISAE 3402/SSAE 18 SOC1 – audit report for financial managers and auditors

  - AT-C 205 SOC 2 - audit report for IT and security professionals

CYBER ESSENTIALS

Privacy

Feel protected knowing the privacy of your data is paramount and built into the fabric of what we do.

- 'Privacy by Design' is the foundation of everything we do.
- Privacy embedded into the design and operation of our platform and business practices.
- Customer data is not used or accessed by TechnologyOne.
- Encrypted data at all times, in transit and at rest.
- Private and isolated database not multi-tenanted with other customers data.

Scalability

Experience the efficiencies of our scale and level of investment to access a service superior to hosting or most in-house capabilities.

- Automatic scaling to cater for peak and seasonal workloads without additional expense.
- Guaranteed continuity of service with Active^n architecture.
- All customers use the same code, regardless of size, location or market vertical.
- All customers benefit from every investment made to add new features or fixes.

Speed & Reliability

Enjoy faster implementation, keep up to date with the latest features and enjoy zero downtime for upgrades.

- Entire software update process managed by TechnologOne.
- Twice-yearly software release cycles for major updates.
- Upgrade in days instead of months.
- Regular delivery of minor updates and patches without interruption.

Accessibility

Tap into our enterprise solution on any device, anywhere, at any time.

- True SaaS, available on all mobile devices.

- Leverage Ci Anywhere, the latest advancement of our Ci platform, that's simpler to use.

- Ci Anywhere uses modern code, specifically designed for browser-based application.

- Embrace smart mobile devices and leverage capabilities on any device including GPS, location services and camera or video.

- Adaptive design built in from the ground up.

Innovation

Access the latest leading-edge technologies to future-proof your business.

- Continuous improvement around compliance, security, open standards, transparency and control.

- 20% of revenue invested in Research and Development.

- Leverage AWS secure cloud services to power our SaaS Platform.

- Designed to enable customers to build innovative systems and solutions.

Sustainability

A globally-aligned sustainability program to ensure good business practices.

- Program focused around our customers, responsible business, our people, community and environment.

- Program aligned to UN Sustainable Development Goals.

- Sound governance is guided by our core beliefs and values.

- Key drivers of the program include compliance, data privacy, security and innovation.
