

Asset Management–

Work planning, work scheduling and work execution - Configuration

OBJECTIVES

At the completion of the learning you will be able to:

- Review Work Systems and related entities
- Build a simple work system, including the “Interface Ledger”
- Map Work Order costs to the financial ledgers
- Allow costs to be booked to Work Orders (Resource Groups for Actuals), including requisitions costed to Work Orders*
- Allow estimated costs to be added to Work Orders (Resource Groups for Estimating)
- Add a prefix to Work Order numbers
- Identify other settings available when configuring Work Order processes.
